The Self-Help Myth May 29 2022 "The Self-Help Myth reveals how philanthropy maintains systems of inequality by attracting attention to the behaviors and responsibilities of poor people while shifting the focus away from structural inequities and relationships of power that produce poverty. The book features foundation investments in addressing migrant poverty in California's Central Valley, simultaneously one of the wealthiest agricultural production regions in the world and home to the poorest people in the United States. The case studies show how compromises between foundation staff and community organizers produce programs that ask farmworkers to help themselves while excluding strategies that address the role of industrial agriculture in creating and maintaining regional poverty. Through archival and ethnographic case studies of foundation investments leading up to the historic Farm Worker Movement, to large scale foundation-driven initiatives to improve conditions in agricultural communities during the 1990s and 2000s, foundations set firm boundaries around definitions of self-help - excluding labor organizing, immigrant rights, and advocacy approaches that hold industry accountable for the enduring abuses of farmworkers and immigrants. Processes of professionalization and institutionalization required to maintain philanthropic relationships further frustrate nonprofit organizational staff increasingly accountable to foundations and not to the people they aim to represent and serve."--Provided by publisher.
