Flexible Working May 17 2021 Mobile working and remote working from home or a small office, using phone, PC, fax and narrowband Internet is a rapidly increasing practice. The many well-documented benefits of working this way include higher productivity, more time spent with the family and local community and less time wasted commuting. At a community level they include benefits to the environment through substituting physical transport by telecommunications, and re-vitalisation of rural communities. Yet, people who work mainly this way face severe problems: a loss of contact with the office grapevine, the out of sight, out of mind syndrome, and exclusion from vital ad-hoc meetings and tutorials. Another major problem is slow speed of communication. This volume summarizes how technologies can revolutionise flexible working practices and go a long way towards solving the isolation problems of flexible workers.

Exploding Zombie Cock Jan 13 2021 The powder was in the top cabinet, behind packs of organic barley and quinoa that we never use. I unwrapped the plastic and took out the bottle. I put on a pair of wash gloves and carefully unscrewed the lid, catching a faint whiff of something, thick, clotted and musty, like a crypt filled with dead spider's webs and moth's wings. I took a tea spoon and scooped out a tiny pinch. It was a dull grey colour. Quick, I stirred it in. A brief fizz as it met the JD and Coke, then nothing. I added two ice cubes. This is a story about an Exploding Zombie Cock by the brilliant James Miller. What more do you need to know?! (If you really have to know more, it definitely lives up the title. And is a bit rude.)

Identifying the specific features of such market by characterizing customers' expectations and providing a competitive analysis of the different launch solutions for small satellites is the second objective of this report. Finally, and from a policy perspective, the book reflects on whether such market could and should be handled on a purely private basis in the European context, or on the contrary generates relevant stakes that compels European institutional actors to become more actively involved in this domain.

I run a Facebook page and a small stall making and selling custom props and toys and wanted to take things to the next level and having no experience in media production this sounded perfect. From my perspective the book is full of all the basic information I needed to get started making the most of my Facebook page and filming video, taking photographs and getting them out there on social media to get the most impact. Then the book is also full of everything else needed to take things even further, how to follow up on the social media interest and even loads of information coming from a business point of view which I'm sure I will use down the line as I take things further. Overall this book had everything I needed to get me up and running on social media, producing what I feel is way better quality content than I could have ever imagined I was capable of and all with a single piece of hardware, my Smartphone, it's amazing."
